Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

patentdocket@oblon.com oblonpat@oblon.com jgardner@oblon.com

Office Action Summary

Application No.	Applicant(s)	
10/564,854	GUGLIELMOTTI	ET AL.
Examiner	Art Unit	
UMAMAHESWARI RAMACHANDRAN	1617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed
- after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.

 Failure to produce the period for reply will be entered for reply

tat	

	reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any ed patent term adjustment. See 37 CFR 1.704(b).
Status	
2a)	Responsive to communication(s) filed on 1/17/2006. This action is FINAL. 2b) This action is non-final. Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.
Disposit	ion of Claims
5)□ 6)⊠ 7)□	Claim(s) 1-3 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. Claim(s) is/are allowed. Claim(s) 1-3 is/are rejected. Claim(s) is/are objected to. Claim(s) are subject to restriction and/or election requirement.
Applicat	ion Papers
10)□	The specification is objected to by the Examiner. The drawing(s) filled on is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.
Priority (under 35 U.S.C. § 119
a)	Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

DETAILED ACTION

Claims 1-3 are pending and are being examined on the merits herein.

Application Priority

This application is a continuation of international patent application no.

PCT/EP04/07635, filed 7/8/200. Priority is claimed based on ITALY MI2003A 001468 filed 7/18/2003..

Information Disclosure Statement

The information disclosure statements (IDS) filed on 1/17/2006 and 4/10/2006 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the IDS is being considered by the Examiner.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1- 3 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products*, *Ltd.* v. *Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/564,854 Page 3

Art Unit: 1617

Claims 1-3 provides for the use of compounds of formula I in the treatment of neuropathic pain, but since the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Applicants are cautioned that claims 1-3, which are nonstatutory, may be subjected to a restriction requirement once amended to conform to US practice.

P.S. For examining purposes the use claims have been interpreted as method claims and the rejections have been made as follows.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior at are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- Resolving the level of ordinary skill in the pertinent art.
- Considering objective evidence present in the application indicating obviousness or nonobviousness.

Application/Control Number: 10/564,854

Art Unit: 1617

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over King et al. (Applicant cited IDS: WO 93/03725) in view of Uchida et al. (U.S. 6,624,162).

King et al. teach compounds of formula (I) as 5-HT4 receptor antagonists (p 2, line 2) and their potential use in the treatment of CNS disorders such as migraine (p 2, lines 5-6).

The reference does not teach the use of the compounds of formula (I) in treating neuropathic pain.

Uchida et al. teaches 5-HT4 receptor modulators (agonists and antagonists) are useful in the treatment of variety of disorders including pain (col. 1, lines 35-36, 43). The reference also teaches compounds with 5-HT4 receptor antagonists and their usefulness in a method of treating pain (col. 56, claims 10, 11).

It would have been obvious to one of ordinary skill in the art at the time of the invention to have used compounds of formula I of King et al. in a method of treating pain because of the teachings of Uchida et al. One having ordinary skill in the art would have

Art Unit: 1617

been motivated to use such compounds in treating pain in expectation of success and in achieving better or similar therapeutic effects upon substitution of one 5-HT4 antagonist for another. Uchida does not explicitly teach that the 5-HT4 antagonists are useful in neuropathic pain. However, neuropathic pain is a species of pain and is classified under physiological pain (Pain and Nociception, Wikipedia). Thus pain in general includes acute, chronic, neuropathic pain etc. Hence it would have been obvious to one of ordinary skill in the art at the time of the invention to have used compounds of formula I in treating neuropathic pain and achieve therapeutic benefits.

Conclusion

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to UMAMAHESWARI RAMACHANDRAN whose telephone number is (571)272-9926. The examiner can normally be reached on M-F 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
